# Agenda

**A Quick Reminder**

**Sharing and Reusing Queries**

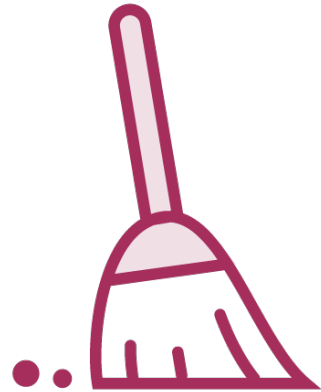

**Demo**

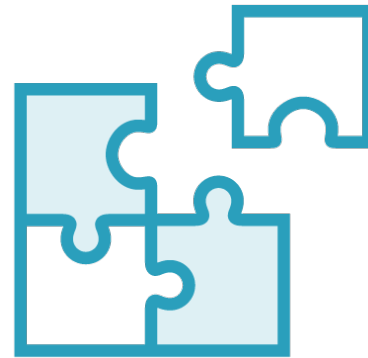

# Power Query

Data retrieval

Cleanse

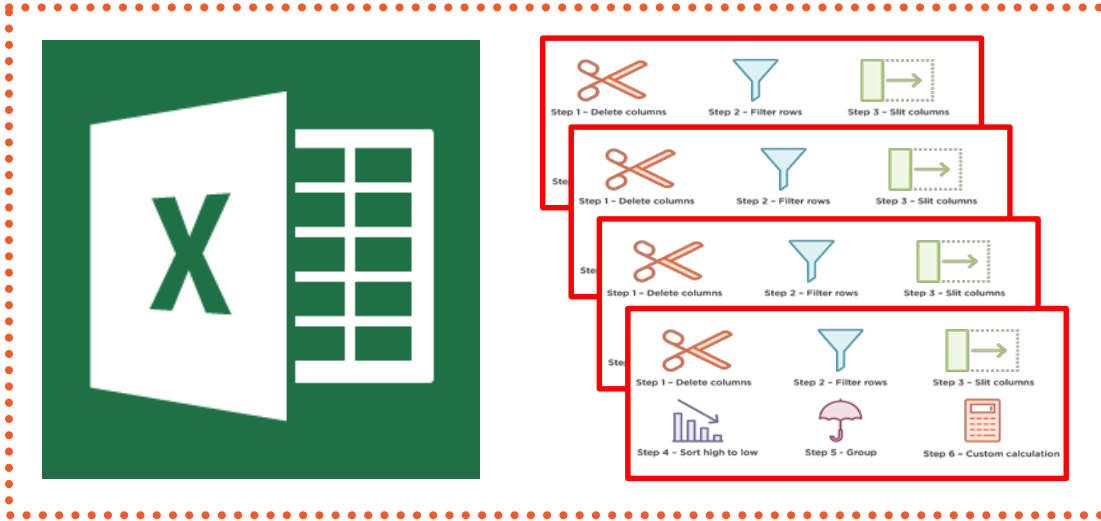

Combine

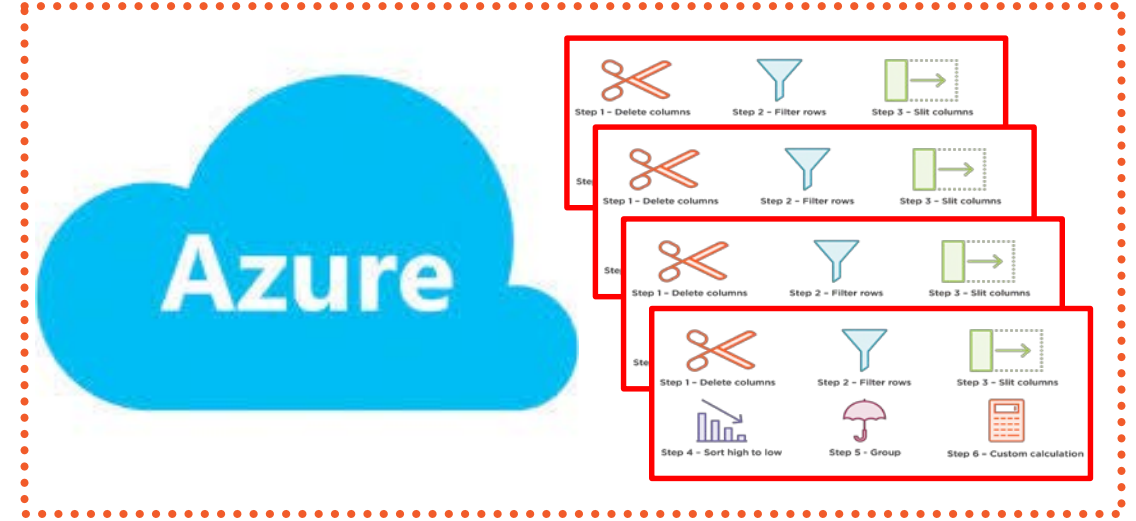

Share

# Sharing Queries

## Excel

Queries are stored in the Excel file.  
Share the Excel file to share the queries.

## Data Catalog

Save the query to the Data Catalog.  
Easier to discover, consume and  
manage the queries across an  
organisation.

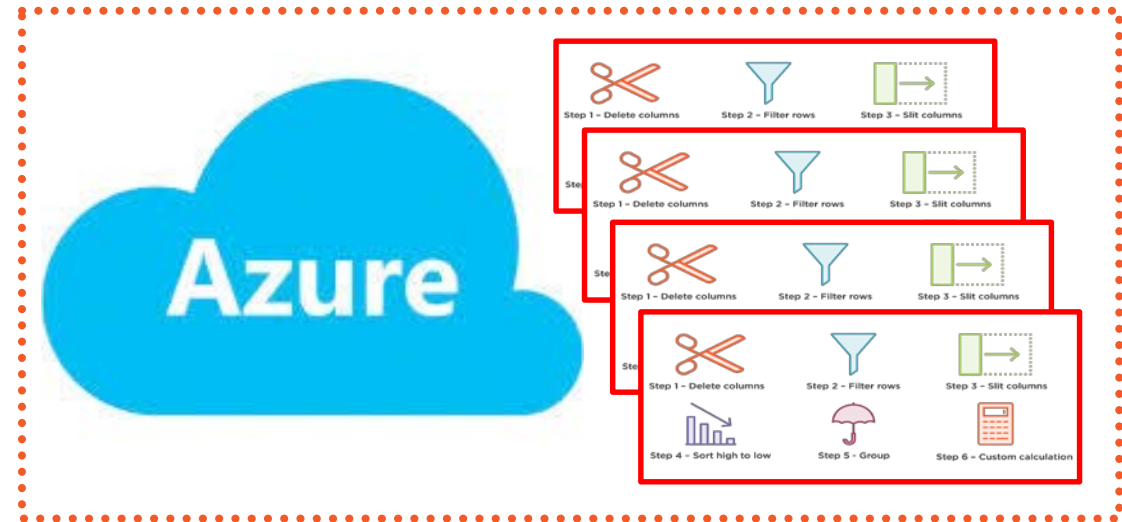

# Notes About the Azure Data Catalog

Replacement for the “old”  
Power BI for Office 365  
Catalog

Requires Azure AD

At the time of recording,  
the Excel and Data  
Catalog integration  
functionality is not  
working for the author

# Excel

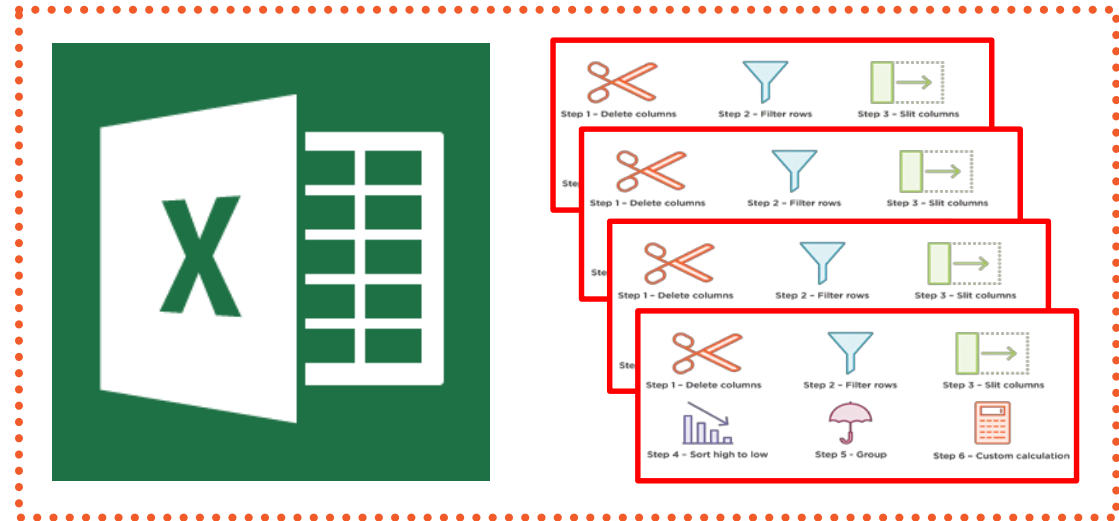

Queries are stored in each Excel file

Queries can be “organised” into Groups

Queries can be copied and pasted between Excel Files

Queries are shared by sharing the Excel file

Difficult to manage multiple 10's of queries

# Demo

## Sharing and Organising Queries in Excel

# Summary

Sharing and reusing queries

Excel for single/few users

Azure Data Catalog for organizational use
